PROFESSIONAL SUMMARY

Third-year Computer Science student at Copperbelt University (expected 2027) working in IT support at the university's Directorate of ICT. Builds database-driven web applications with Laravel, PHP, JavaScript and MySQL, and brings a practical, problem-first approach to both development and user support. **Open to work, including remote positions** (internships, junior developer and IT support roles).

TECHNICAL SKILLS

Languages: PHP, JavaScript, C++, SQL
Web: HTML5, CSS3, Responsive Design, Laravel, Livewire, Tailwind CSS, Fetch API, ES Modules
Data & Tools: MySQL, database design, Git, GitHub, GitHub Pages, VS Code
Professional: IT support, troubleshooting, clear communication, requirements and workflows

WORK EXPERIENCE

IT Support

Directorate of ICT (DICT), Copperbelt University, Kitwe, Zambia | 2026 to Present

- Provide IT support within the university's ICT directorate, helping staff and users resolve technical issues.
- Collaborate with a team on an inventory system project, learning how requirements, workflows and database structure fit together.

PROJECTS

Bus Ticketing & Management System

Laravel, PHP, Livewire, MySQL, Tailwind CSS

Booking platform with schedules, seat selection and customer, admin and driver workflows, on a structured data model for buses, routes, schedules, seats and bookings. View on GitHub

Student Registration & Results Pages

HTML5, CSS3, JavaScript

Semantic, accessible registration form with client-side validation and a structured course results table. View on GitHub

Interactive Product Catalog & Cart

JavaScript, ES Modules, Fetch API, localStorage

Loads product data from an API into a catalog; cart state persists in local storage. View on GitHub

Interactive Portfolio Lab

HTML, CSS, JavaScript

DOM-driven theme switcher, dynamic skill list, live filtering and form validation in vanilla JavaScript. View on GitHub

Personal Portfolio Website

HTML, CSS, GitHub Pages

Responsive portfolio showcasing projects, experience and contact details. View on GitHub
